## RECYCLING PROBLEM?

LET THE OMNIA R&D  
TEAM HELP YOU FIND  
A SOLUTION

Our recycled plastic can be made into a diverse range of products from fenceposts to children's playgrounds - contact our innovations department to find out how we can help.

We manufacture our products directly from the mixed plastic waste stream giving our customers a completely closed loop recycling route.

The end result is an extremely versatile material with similar properties of strength and ease of use as timber but being plastic it will not rot or degrade.

Our innovations division take a proactive approach to a very dynamic market, and are constantly developing new ideas.

Forming a strategic partnership with Omnia will provide real world, sustainable solutions; turning problems into assets:

- No segregation
- No separation
- No complication

### IMAGINE A PRODUCT THAT:

- HAS ALL THE QUALITIES OF WOOD
- LASTS FOR DECADES
- WILL NOT SPLINTER
- JET WASHABLE
- VANDAL RESISTANT
- MAINTENANCE FREE
- FUNGI RESISTANT
- VERY DURABLE

### IMAGINE THE POSSIBILITIES!
